- ✓ Dedicated Full Stack Web Developer focusing on ReactJS, React-Native, and MongoDB applications.
- ✓ Well-versed in the Salesforce ecosystem as a certified administrator. Actively pursuing developer certifications.

PROFESSIONAL EXPERIENCE & PROJECTS

Magellan Development | Chicago, IL | Active Project

Magellan Rewards Website and Mobile Application

- Building a unique website using ReactJS, a mobile application for iOS/Android, and integrating a cloud base database.
- Users will be able to scan a QR code to download an app to access hundreds of local partner businesses for promotions.
- Designing the UI/UX with Material UI, Reactstrap, Bootstrap, and Framer-motion animations.
- Establishing scalable production ready assets and utilizing optimization methods (i.e., Redux, AWS S3).

E-store | Chicago, IL | "For Fun" Project

Ecommerce Mock Store | ReactJS, Redux, JavaScript, Express, MongoDB, NodeJS

- Developed a full-service ecommerce store from the ground up to help strengthen my web development skills.
- Features include shopping cart, product review/ratings, product pagination, user profile, order history, admin product management, admin user management, admin order details, PayPal API integration, delivery pipeline, and database seeder.
- Used Bootstrap for the main UI/UX design.

United States Navy | San Diego, CA | 2018-2020

United States Navy SEAL Candidate

- Studied at Naval Special Warfare, San Diego, receiving an education in mental toughness, dive physics, basic combat patrolling, and attention to detail from decorated Navy SEALs.
- Qualified to enter BUD/S Preparatory School and BUD/s selection by meeting physical and mental qualifications.
- Secured Hell Week August 2nd 2019 as a squad (boat crew) leader: 5.5 days (132 hours) of no sleep | 240+ miles in boots/sand
